Experience

April 2024 to present

Part-time intern Developer, Itransition   **Lakewood , United States**

Itransition is one top Software companies in the world. Here, I am doing my internship as a ruby developer. Here we don't work in any specific stack by project basis any stack can be changed anytime.

December 2023 to May 2024

Junior Software Engineer, Techjodo   **Mirpur 10, Dhaka**

Here I started my software development journey. I worked in php Laravel. I have worked in a ecommerce inventory SAAS based project, Billing software , lite package.

October 2023 to November 2023

Intern Developer, One Stop ICT   **Uttara, Dhaka**

Here I have learnt very basics of php and laravel.

Skills

Languages: JavaScript , PHP, Ruby(beginner)
Library: Jquery(6 months) , React(beginner)
Frameworks: Laravel(1year), Rails(beginner)

Laravel Projects

Billing Software :

When one software company sells websites and domain, its very difficult to maintain all the accounts in the end of month. Even When they sell service type websites SAAS. We tried to automate the whole process in the end of month.

Packages: yajraDatatables with vite, select2(jquery Library),Laravel Debugbar

Details : https://zabeer.netlify.app/billing

Todo list API :

This is my most favorite project. Api developed for frontend and dropzone plugin added here.

git link: https://github.com/zabeer01/todolist_api

pos_system :

the pos system done only with frontend but have a plan to add ajax to send the data to DB,

Payment system , Invoice this is my ongoing project.

Project Demo link:

git link:

https://github.com/zabeer01/pos_system

dom_js

Vanilla js with dom manipulation only for frontend.

GitHub Link:

https://github.com/zabeer01/js_dom

Ecommerce Website | Laravel:

This is a full project. Frontend Controller, product controller, category controller used separately.

Languages: Html, CSS, Bootstrap-5, javascript, Jquery, Php

Framework: Laravel

Database: Mysql.

Modules:

Count: when admin add a product that will come in count.

Add to cart: add to cart table is created. When someone order the product will be decreased
automatically. Total sum of the products will be added while order.
