

Syed Abdullah Zabir

Experience

Software Engineer, Glifnode

December 2024 to feb 2026

Uttara , Dhaka

Here, my primary role involves developing APIs with Node express, Laravel for frontend and mobile app developers. Additionally, I've contributed to WordPress development by working on custom plugins.

Achievements:

- ** Increased 50% values of maximum projects which are assigned to me and proposing future requirements by analysis the business and generated many leads from there as a project manager.**
- ** Introduced Filament with laravel which already reduced 70% of the development time.**
- ** Introduced Laravel – sail where everyone can maintain different versions of php in a same machine in laravel as well as wordpress plugin.**
- ** Developed an app with express within 7 days (Learning and implementation of the ecommerce) as Client Demanded the project should be build in express, mongodb-mongoose,**
- ** Improved plugin development time almost 90% with react js instead of using jquery and js by solving state management and building rest api in wordpress using JWT.**

Backend Developer, Unified Core LTD

July 2023 - December 2024

Eskaton , Dhaka

I have experience working on a Human Resource (HR) management system and a SaaS-based eCommerce platform, where I contributed to building scalable features, improving performance, and ensuring a smooth user experience.

Projects

Chat / Video /Audio Calling APP:

- * Used Clerk authentication for enhanced built-in security instead of JWT.**
- * Independently handled full-stack development and deployment (Frontend, Backend, APIs).**

Features:

chat system (socket) | video calling (webrtc) | audio calling | screen sharing | reply | friend request
| theme color changing (7 themes) | authentication (jwt)

LIVE LINK : <https://zstream.zabeer.online/>

(Node express, Mongodb, React, Mongoose, Zustand , tanstack query , AXIOS)

Scaling: Millions of socket users can be handled with concurrency.

Movie APP (Laravel , Mysql, Next.js):

- * Movies are uploaded with AWS S3.**
- * Mobile App version is released with flutter**
- * Subscription model Stripe payment system is integrated.**
- * Tv Series and reels are integrated.**
- * Next.js in the frontend and laravel for RestApi.**

Live Link: <https://azlotv.com/>

Wordpress plugins:

Tapedb: * wordpress plugin with react * zustand is used * wordpress rest api *jwt * mysql indexing * GCS (google cloud) instead of wordpress file storage.

Website: <https://tapedb.zabeer.dev>

Laravel Microservice:

Docker (Laravel Sail) | RabbitMQ Message Broker

** Communication between completely separate application.

** 6 servers. 3 is for one app and 3 is for another app. (laravel main app, mysql and phpmyadmin)

Github: https://github.com/zabeer001/microservice_laravel

Booking System (Clean Code Structure):

Features: Auto-generated Google Meet link using **Google Calendar API***

* Not only file more than 100 lines of code.

* Service Layer **SOLID** design patterns with DI (**Dependency Injection**). Interface Segregation Applied in Booking service.

Github: <https://github.com/zabeer001/calendly-clone>

Problem Solving

Leetcode: 52 problems(regular)

CodeForce: 40 problems

Link : <https://leetcode.com/u/srKRAUCkOK>

Skills

Languages: JavaScript , PHP

Primary Frameworks: Node Express, Laravel, React(Frontend)

Secondary Frameworks: Wordpress Plugin, Asp dot net core,

TECHS: SOCKET, WEBRTC, Docker, Throttling , alpine js, zustand ,TanSatck query , REDIS.

Design and Architecture: Singleton, Factory, Dependency Injection, IOC ,

Database: SQL like databases , Mongoddb (mongoose).

Devops(Beginner): shared and vps deployment, Docker .

Business Applications: Ecommerce(Saas Based), Hr system , Movie App (AWS S3), Socket.io.

Education

BSC: Royal University, CSE|| CGPA: 3.67 || passing year: 2023
