Experience

December 2024 to feb 2026

Software Engineer, Glifnode

Uttara , Dhaka

Here, my primary role involves developing APIs with Node express, Laravel for frontend and mobile app developers. Additionally, I've contributed to WordPress development by working on custom plugins.

Achievements:

- ** Increased 50% values of maximum projects which are assigned to me and proposing future requirements by analysis the business and generated many leads from there as a project manager.
- ** Introduced **Filament** with laravel which already reduced **70%** of the development time.
- ** Introduced **Laravel – sail** where everyone can maintain different versions of php in a same machine in laravel as well as wordpress plugin.
- ** Developed an app with express within **7 days** (Learning and implementation of the ecommerce) as Client Demanded the project should be build in express, mongodb-mongoose,
- ** Improved **plugin development** time almost **90%** with react js instead of using jquery and js by solving state management and building rest api in wordpress using JWT.

July 2023 - December 2024

Backend Developer, Unified Core LTD

Eskaton , Dhaka

I have experience working on a Human Resource (HR) management system and a SaaS-based eCommerce platform, where I contributed to building scalable features, improving performance, and ensuring a smooth user experience.

Projects

SOCIAL MEDIA APP (WEB + MOBILE):

- * Real Time chatting (socket) , video and audio calling feature.
- * Friends adding system.
- * Like Comment Share feature.
- * Google authentication (oauth2) (mobile + web)
- * Independently handled full-stack development and deployment (Frontend, Backend, APIs).
- * Login with google . Outh2.
- * Notification System.

Web Version:

Frontend: React,, Zustand , tanstack query , AXIOS.

Backend: Node express, Mongodb, Mongoose, pusher js.

Deployment: Hostinger VPS (UBUNTU).

LIVE LINK : <https://zstream.zabeer.online>

Mobile APP:

typescript , REACT Native, EXPO. (some modules and package are native)

Download app:

<https://expo.dev/accounts/zabeer32/projects/zstream/builds/439bce17-b12b-4c11-945d-ec609e89ff63>

NOTE: The backend, frontend, and mobile application were fully designed and developed by me independently, with no other developers involved in the project.

Tape Collection Project:

- * Many tape collection.
- * Infinity scrolling.
- * GCS (GOOGLE CLOUD Storage integration.)
- * Indexing
- * Rate Limiting.
- * Multiple role Handling.
- * Laravel Sail (docker based)
- * authentication with refresh token.

Architecture: Solid design pattern, Custom Dependency Injection

Frontend : React + Daisy ui. (10 + color theme.)

Backend: Laravel + mysql (Rest Api approach)

Website: <https://tapedb.com>

Laravel Microservice:

Docker (Laravel Sail) | RabbitMQ Message Broker

- ** Communication between completely separate application.
- ** 6 servers. 3 is for one app and 3 is for another app. (laravel main app, mysql and phpmyadmin)

Github: https://github.com/zabeer001/microservice_laravel

Booking System (Clean Code Strcuture) :

Features: Auto-generated Google Meet link using **Google Calendar API***

- * Not only file more than 100 lines of code.
- * Service Layer **SOLID** design patterns with DI (**Dependency Injection**). Interface Segregation Applied in Booking service.

Skills

Languages: JavaScript , PHP

Primary Frameworks: Node Express, Laravel, React(Frontend)

Secondary Frameworks: Wordpress Plugin, Asp dot net core,

TECHS: SOCKET, WEBRTC, Docker, Throttling , alpine js, zustand ,TanSatck query , REDIS.

Deaign and Architechture: Singleton, Factory, Dependency Injection, IOC ,

Database: SQL like databases , Mongodb (mongoose).

Devops(Beginner): shared and vps deployment, Docker .

Business Applications: Ecommerce(Saas Based), Hr system , Movie App (AWS S3), Socket.io.

Education

BSC: Royal University, CSE|| CGPA: 3.67 || passing year: 2023
